Substance and Purpose

The Proposed Amendments implement an access equals delivery model for prospectuses generally, annual financial statements, interim financial reports and related management's discussion & analysis (**MD&A**) for non-investment fund reporting issuers.

The proposed access equals delivery model (the **AED Model**) contemplates the following:

- in all jurisdictions except British Columbia, providing public electronic access to a document and alerting investors that the document is available will constitute delivery for prospectuses under securities legislation;
- in British Columbia, an exemption from the requirement under securities legislation to send a prospectus (the **BC Exemption**) will permit access *instead* of delivery;
- for annual financial statements, interim financial reports and related MD&A, providing public electronic access to the documents and alerting investors that the documents are available will constitute delivery for the documents; and
- in all cases, delivery of a document will occur, or the conditions in the BC Exemption will be met, when:
 - the document is filed on the System for Electronic Document Analysis and Retrieval (**SEDAR**), and
 - where applicable, a news release is issued and filed on SEDAR indicating that the document is available electronically and that a paper or an electronic copy can be obtained upon request.

The purpose of the proposed AED Model is to modernize the way documents are made available to investors and reduce costs associated with the printing and mailing of documents, which are currently borne by issuers. The proposed AED Model provides a more cost-efficient, timely and environmentally friendly manner of communicating information to investors than paper delivery. In our view, the proposed AED Model reduces regulatory burden on issuers without compromising investor protection.

We recognize that information technology is an important and useful tool in facilitating communication with investors. The proposed AED Model is consistent with the general evolution of our capital markets, including how investors are increasingly accessing and consuming information electronically.

The proposed AED Model offers benefits for both issuers and investors. The proposed AED Model further facilitates the communication of information by enabling issuers to reach more investors in a faster and more effective manner than by mailing documents. SEDAR is a common, standardized platform that provides ease and convenience of use for investors, allowing them to access and search for specific information in a document more efficiently than they would otherwise be able to with paper copies of documents.

The proposed AED Model does not remove an investor's ability to request documents in paper or electronic form or prevent an issuer from delivering financial statements and related MD&A based on an investor's standing instructions.

The Proposed Amendments would implement the proposed AED Model for prospectuses generally, annual financial statements, interim financial reports and related MD&A. In our view, the proposed AED Model is well suited for these types of documents, which are increasingly being accessed electronically by investors. At this time, we are not proposing an access equals delivery model for the delivery of documents that require immediate shareholder action and participation, such as proxy-related materials and take-over bid and issuer bid circulars.

Background

On January 9, 2020, we published CSA Consultation Paper 51-405 *Consideration of an Access Equals Delivery Model for Non-Investment Fund Reporting Issuers*. The purpose of the consultation was to provide a forum for discussion on the appropriateness of implementing an access equals delivery model in the Canadian market. We solicited views on whether an access equals delivery model should be introduced, the types of documents to which an access equals delivery model should apply and the mechanics of a potential access equals delivery model.

The comment period ended on March 9, 2020. We received 30 comment letters from various market participants, including issuers, investors, industry associations and law firms. We wish to thank all commenters for contributing to the consultation.

We have reviewed the comments received, and we note as follows:

- A large majority of commenters expressed general support for implementing an access equals delivery model.
- A majority of commenters expressed support for prioritizing implementing an access equals delivery model for prospectuses, annual financial statements, interim financial reports and related MD&A.
- Although many commenters expressed general support for extending an access equals delivery model to other types of documents, such as proxy-related materials and takeover bid and issuer bid circulars, some commenters indicated that the CSA should carefully consider the impact of introducing an access equals delivery model to documents that require a time sensitive response from investors.
- Several commenters submitted that filing a document on SEDAR (and not also posting the document on the issuer's website) is sufficient as it provides a common, standardized platform that allows investors to access issuers' documents.
- A majority of commenters agreed that a news release is sufficient to alert investors that the document is available electronically.
- Commenters identified several benefits of an access equals delivery model, including reducing regulatory burden and costs for issuers, modernizing the way documents are made available to investors and promoting a more environmentally friendly manner of communicating information than paper delivery.
- The main limitations to implementing an access equals delivery model identified by commenters are the delivery requirements outside of securities legislation (e.g. corporate law) and electronic transactions legislation. In addition, some commenters noted the potential negative impact on investor engagement.

In light of the comments received and our analysis, we think it is appropriate to propose the AED Model for prospectuses generally, annual financial statements, interim financial reports and related MD&A into the Canadian market.

Summary of the Proposed Amendments

Prospectuses

The proposed AED Model applies to all types of prospectuses, except rights offerings by way of prospectus and medium-term note (**MTN**) programs and other continuous distributions under a shelf prospectus. The proposed AED Model may not be suitable for a rights offering by way of prospectus since this type of distribution requires a time sensitive response. MTN programs and other continuous distributions under a shelf prospectus are dealt with in a different manner in our rules and are not suited for the proposed AED Model. It also does not apply to a prospectus offering of investment fund securities.

Except in British Columbia, the Proposed Amendments contemplate that a prospectus or any amendment must be delivered or sent by providing access to the document in accordance with the procedures set out in the rules, unless the document is delivered or sent pursuant to another procedure prescribed by securities legislation.

British Columbia is instead providing an exemption from the prospectus delivery requirements because it better aligns with British Columbia's legislative authority and approach to legislative drafting. The BC Exemption is intended to achieve the same outcome as the AED Model proposed in the other jurisdictions.

The Proposed Amendments stipulate that, in all jurisdictions except British Columbia, access to the final prospectus or any amendment has been provided if:

- the issuer has filed the document on SEDAR and a receipt has been issued for the document, and
- the issuer has issued and filed a news release on SEDAR announcing that the document is available and accessible on SEDAR, indicating the securities that are offered and specifying that a paper or an electronic copy of the document can be obtained upon request.

Under the BC Exemption, a dealer is exempt from requirements under securities legislation to send a final prospectus or any amendment to a purchaser if these same conditions are met.

The Proposed Amendments clarify that, under the proposed AED Model, the right to withdraw from an agreement to purchase securities may be exercised within 2 business days after the later of (a) the date that access to the final prospectus or any amendment has been provided, and (b) the date that the purchaser has entered into the agreement to purchase the securities. In British Columbia, it is a condition of the BC Exemption that an equivalent right be provided to a purchaser.

We are also proposing to require a cross-reference on the front page of the prospectus to alert investors to the section that explains how the withdrawal right period is calculated under the AED Model.

For the preliminary prospectus or any amendment, the Proposed Amendments stipulate that access has been provided if the issuer has filed the document on SEDAR and a receipt has been issued

for the document. In this scenario, the Proposed Amendments do not require that the issuer issue and file a news release on SEDAR to alert investors because investors should be aware of when the preliminary prospectus is available by virtue of their interest in the distribution. In our view the requirement to file a news release is important in connection with the final prospectus because the investor's withdrawal right period is calculated at this stage.

The Proposed Amendments clarify how the AED Model applies to the advertising and marketing of a prospectus offering, including with respect to the preliminary prospectus, and update the statements contained in the marketing materials to inform investors that the prospectus or any amendment is available on SEDAR and that a copy of the document can be obtained upon request.

The proposed AED Model has been adapted to suit the particularities of different types of prospectuses, i.e. long-form prospectuses, short-form prospectuses, shelf prospectuses and post-receipt pricing prospectuses.

In certain jurisdictions, amendments to local securities acts may be required to fully implement the Proposed Amendments.

Financial Statements and related MD&A

The Proposed Amendments contemplate that the proposed AED Model applies to annual financial statements, interim financial reports and related MD&A.

The Proposed Amendments provide that the issuer must issue and file a news release to inform investors that its financial statements and related MD&A are available on SEDAR, unless the issuer complies with the current delivery requirements. The Proposed Amendments stipulate that access to the financial statements and related MD&A has been provided if

- the issuer has filed the documents on SEDAR, and
- on the same day that it has filed the documents, the issuer has issued and filed a news release on SEDAR announcing that the documents are available electronically and specifying that a paper or an electronic copy of the documents can be obtained upon request.

We think the proposed AED Model is especially well suited for these types of documents since investors are generally aware that the documents will be available on SEDAR. Investors can also predict when the documents will be available since they are subject to prescribed filing deadlines.

Issuers may still be required to comply with certain delivery requirements under corporate law and other applicable requirements to which they may be subject.

The proposed AED Model would also be available to SEC foreign issuers and designated foreign issuers.

Consequential Amendments

We are proposing changes to National Policy 47-201 *Trading Securities Using the Internet and Other Electronic Means* to clarify that the investment dealer conducting a road show must make an oral statement at the commencement of the road show that the relevant prospectus or any

amendment is available on SEDAR, or provide the investor with a copy of the relevant prospectus or any amendment.

We are proposing changes to Companion Policy 54-101CP to National Instrument 54-101 *Communication with Beneficial Owners of Securities of a Reporting Issuer* to clarify the interaction between the current delivery requirements and the proposed AED Model with respect to financial statements and related MD&A.

Local Matters

Where applicable, an additional annex is being published in any local jurisdiction that is making related changes to local securities laws, including local notices or other policy instruments in that jurisdiction. It also includes any additional information that is relevant to that jurisdiction only.

Request for Comments

We welcome your comments on the Proposed Amendments and also invite comments on the following specific questions.

1. With regards to financial statements and related MD&A, the Proposed Amendments provide that an issuer must issue and file a news release on SEDAR announcing that the documents are available electronically and specifying that a paper or an electronic copy of the documents can be obtained upon request.
 - a. Would the requirement to issue and file a news release be unduly costly or onerous in these circumstances? If so, why? Would the burden differ depending on whether the issuer is a venture issuer or not?
 - b. Should we consider alternative ways to alert investors of the availability of a document that could be less onerous? Which ones and why?
